

First Congregational Learning Center

Director's Notes:

Welcome Summer Staff!

FCLC has three fabulous new faces in the building this summer. All are spending their summer off from college helping your children learn and grow. The toddler room has been getting to know Ms. Caroline and Ms. Alexis. In preschool we have Ms. Hannan. It will be a fun and exciting time during our summer program as we learn about music and dance.

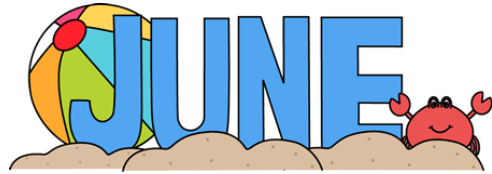

Have a fun and safe summer!

Ms. Kimberly

Infant News (Room 204)

Summer is here and that means we will be spending more time outside. Please make sure your child has sunscreen and a hat. Check your child's basket to ensure they have appropriate clothing for the warmer weather. We plan to have some days where infants will participate in small water activities, so please be sure to keep their bins stocked with extra clothes.

Toddler News (Room 202):

This month the toddlers will begin their summer exploring movement and dance. This will be done during outdoor time as they walk, run and play. Inside the classroom the children will experiment with different rhythms and tempos as well as expressing themselves through dance. Building on developing independence, they will explore water and ice while seeking information by mixing colors and using tools.

We will be working on cooperative interactions with one another as we welcome some new friends from the infant room. We are learning to play near and with other children and how to respond appropriately to one another. With Father's Day this month, we will have conversations about dads, participate in songs, and explore books about the many fun ways they show their love.

Preschool News (Room 205):

Summer at FCLC is here and we have so many fun activities lined up. This summer we will be discussing and learning about a wide variety of music and dance. We will be learning about different music genres, instruments, music from other countries and how it impacts cultures, and different styles of dance as well. We will be listening to different styles and sounds we may not have heard before, as well as learning about the instruments used to make those sounds. We will also be creating our own instruments. Field trips are also coming up this summer. They will take place in July and August. Information for those will be passed out as the dates get closer. We are looking forward to a fun summer and hope you are too!
